ULTRA HIGH MOLECULAR WEIGHT POLYETHYLENE MOLDED ARTICLE FOR

Group Unit: 13738

Date: September 10, 1999

ARTIFICIAL JOINTS AND METHOD OF PREPARING THE SAME

AMENDMENT UNDER 37 CFR § 1.116

Assistant Commissioner of Patents Washington, D.C. 20231

Sir:

For:

In response to the Office Action dated May 10, 1999, please amend the abo identified application as set forth below:

IN THE CLAIMS:

1. (Five Times Amended) An ultra high molecular weight polyethylene molded block having been crosslinked slightly and having been compression-deformed in a direction perpendicular to a compression plane, cooled and solidified in a compression-deformed state so as to have orientation of crystal planes in a direction parallel to the compression plane, and a thickness range of 5 to 10 mm in a direction perpendicular to the compression plane.

(Four Times Amended), A method for producing an ultra high molecular weight polyethylene molded block having orientation of crystal planes in a direction parallel to a compression plane, comprising slightly crosslinking an ultra high molecular weight
